Summary

Information Systems graduate from Universitas Trunojoyo Madura with 4 years of experience as a Full-Stack Web Developer. Experienced in developing scalable web applications, optimizing databases, and building modern full-stack ecosystems using React.js, Next.js, Laravel, and SQL-based technologies. Passionate about WebGIS, spatial data analysis, and high-performance web architectures.

Education

Universitas Trunojoyo Madura — Bangkalan, East Java
Bachelor of Science in Information Systems — Aug 2022 – July 2026
Faculty of Engineering — 4 years
- GPA: 3.74/4.00

Experience

CV. Pakde Kingdom (PAK D Group) — Surabaya, East Java, Indonesia
AI Engineer (MagangHub Internship) — Aug 2026 – present — 3 months
- Working as an AI Engineer intern through the MagangHub internship program.

Citra Leap Solution — Freelance – Present
Full-Stack Web Developer (Freelance)
- Freelance full-stack web developer delivering commercial web development projects.

NF Academy — Remote
Full-Stack Web Developer — Feb 2025 – June 2025 — 5 months
- Engineered Roompi, a room booking platform using React.js and Laravel with modular front-end structures and RESTful API integration.
- Developed an end-to-end bookstore e-commerce platform with optimized state management and responsive user interfaces.

Universitas Trunojoyo Madura — Bangkalan, East Java
Lead & Teaching Assistant — Computer Science Practicums — Sept 2023 – June 2026 — 2 years 10 months
- Facilitated hands-on programming laboratory sessions and delivered technical instruction for 6 core courses, including Web, Mobile, OOP, and Database Management Systems.
- Conducted comprehensive code reviews and evaluated programming logic for over 25+ undergraduate students per class across multiple academic terms.

IKAMALA UTM — Bangkalan, East Java
Staff of Information and Communication Division (INFOKOM) — Mar 2023 – Feb 2025 — 2 years
- Managed organizational digital communication and designed branding assets for public information dissemination.

Projects

Peta Kuliner Sumenep Dec 2025 – May 2026

petakulinersumenep.my.id | GitHub

- Successfully engineered and deployed a WebGIS application for searching, mapping, and clustering culinary MSMEs in Sumenep, which served as a finalized senior thesis for a Bachelor's degree in Information Systems.
- Created a responsive map visualization interface using Leaflet.js and built a dedicated microservice using Flask to perform spatial clustering.
- Engineered the core system using Laravel, Tailwind CSS, and MySQL, alongside Laravel Breeze implementation for secure user authentication.

Open Data Disabilitas July 2025 – Dec 2025

opendatadisabilitas.com | GitLab

- Contributed as one of two student developers in a research initiative by three faculty members from the Information Systems Department at Trunojoyo University of Madura.
- Built an open data system used by the National Commission on Disabilities (KND) to manage and publish accessibility-related data assets.
- Developed interactive diagrams and comprehensive data maps showing the geometric distribution of disability records using Leaflet.js.
- Implemented structural features to create, update, delete, search, and filter disability data using CodeIgniter, PHP, MySQL, and Tailwind CSS.

Roompi — Room Booking Platform Feb 2025 – June 2025

roompi-nfa.netlify.app | GitHub

- Collaborated in an agile team of 5 to architect Roompi, successfully delivering a production-ready reservation system with an optimized state-management flow that cut interactive rendering time.
- Developed core system logic, including user authentication workflows, room reservation mechanisms, and advanced room search and filtering features via MySQL.

KWT Dorang Cinta May 2026 – June 2026

kwt-dorang-cinta.vercel.app | GitHub

- Developed a dedicated web application to support promotional, management, and operational data workflows at KWT Dorang Cinta in Surabaya.
- Built a modern, highly responsive front-end application layout utilizing Next.js, Tailwind CSS, and Shadcn UI for modular components.
- Engineered a centralized admin dashboard backed by Supabase to streamline the management of production metrics, transaction logs, and organizational activity records.

Leadership and Activities

Meta AI Accelerate with Llama Program: Completed intensive training focused on generative AI integration, prompt engineering, and open-source Llama model implementation.

Junior Web Developer Certification: Obtained national competency certification covering web architecture, front-end development, and clean coding practices.

Skills

Programming & Frameworks: React.js, Next.js, Laravel, Node.js, Tailwind CSS, PHP, JavaScript, TypeScript, Go, Python/FastAPI, Inertia.js, Filament

AI & Machine Learning: RAG/FAISS, LLM APIs (Google GenAI, Groq, OpenAI), PyTorch, Hugging Face

Databases & Infrastructure: MySQL, PostgreSQL, Prisma, Supabase, SQL, Docker, Nginx

Tools & Platforms: Git, GitHub Actions, Turborepo, Figma, Elementor

Specializations: Full-Stack Development, WebGIS, Spatial Data Analysis (DBSCAN), Technical SEO

Languages: Indonesian (Native), English (Professional Working Proficiency)
